QUINOA FLAKES

Quinoa is an ancient pseudo cereal that has been grown for over 5,000 years in the Andes Mountain, mainly around the Titicaca Lake region (Peru and Bolivia). Before the Spaniards arrived to South America, Quinoa was, together with potatoes and corn, the basis for their nutrition and considered a sacred crop, a gift from God. Throughout the last years, value added products from Quinoa, such as Quinoa Flakes have been developed in order to satisfy the needs of every consumer.

Process:

Once the white quinoa grain is cleaned, scarified, washed, selected, sorted and color classified, it is laminated. Rollers elaborate the laminating process and provide the “flake” appearance.

Description:

Quinoa Flakes are small raw cream cereal pellets similar to the appearance of a small oat flake. It contains all of the health benefits of Quinoa Grains.
